Reply form for the ESMA MiFID II/MiFIR Discussion Paper

22 May 2014

European Securities and
Markets Authority

Date: 22 May 2014

Responding to this paper

The European Securities and Markets Authority (ESMA) invites responses to the specific questions listed in the ESMA MiFID II/MiFIR Discussion Paper, published on the ESMA website ([here](#)).

Instructions

Please note that, in order to facilitate the analysis of the large number of responses expected, you are requested to use this file to send your response to ESMA so as to allow us to process it properly. Therefore, please follow the instructions described below:

- i. use this form and send your responses in Word format;
- ii. do not remove the tags of type <ESMA_QUESTION_1> - i.e. the response to one question has to be framed by the 2 tags corresponding to the question; and
- iii. if you do not have a response to a question, do not delete it and leave the text “TYPE YOUR TEXT HERE” between the tags.

Responses are most helpful:

- i. if they respond to the question stated;
- ii. contain a clear rationale, including on any related costs and benefits; and
- iii. describe any alternatives that ESMA should consider

Given the breadth of issues covered, ESMA expects and encourages respondents to specially answer those questions relevant to their business, interest and experience.

To help you navigate this document more easily, bookmarks are available in “Navigation Pane” for Word 2010 and in “Document Map” for Word 2007.

Responses must reach us by **1 August 2014**.

All contributions should be submitted online at www.esma.europa.eu under the heading ‘Your input/Consultations’.

Publication of responses

All contributions received will be published following the end of the consultation period, unless otherwise requested. **Please clearly indicate by ticking the appropriate checkbox in the website submission form if you do not wish your contribution to be publicly disclosed. A standard confidentiality statement in an email message will not be treated as a request for non-disclosure.** Note also that a confidential response may be requested from us in accordance with ESMA’s rules on access to documents. We may consult you if we receive such a request. Any decision we make is reviewable by ESMA’s Board of Appeal and the European Ombudsman.

Data protection

Information on data protection can be found at www.esma.europa.eu under the heading ‘Disclaimer’.

1. Overview

2. Investor protection

2.1. Authorisation of investment firms

Q1: Do you agree that the existing work/standards set out in points Fehler! Verweisquelle konnte nicht gefunden werden. and Fehler! Verweisquelle konnte nicht gefunden werden. Fehler! Verweisquelle konnte nicht gefunden werden. provide a valid basis on which to develop implementing measures in respect of the authorisation of investment firms?

<ESMA_QUESTION_1>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_1>

Q2: What areas of these existing standards do you consider require adjustment, and in what way should they be adjusted?

<ESMA_QUESTION_2>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_2>

Q3: Do you consider that the list of information set out in point Fehler! Verweisquelle konnte nicht gefunden werden. should be provided to Home State NCAs? If not, what other information should ESMA consider?

<ESMA_QUESTION_3>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_3>

Q4: Are there any other elements which may help to assess whether the main activities of an applicant investment firm is not in the territory where the application is made?

<ESMA_QUESTION_4>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_4>

Q5: How much would one-off costs incurred during the authorisation process increase, compared to current practices, in order to meet the requirements suggested in this section?

<ESMA_QUESTION_5>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_5>

Q6: Are there any particular items of information suggested above that would take significant time or cost to produce and if so, do you have alternative suggestions that would reduce the time/cost for firms yet provide the same assurance to NCAs?

<ESMA_QUESTION_6>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_6>

2.2. Freedom to provide investment services and activities / Establishment of a branch

Q7: Do you agree that development of technical standards required under Articles 34 and 35 of MiFID II should be based on the existing standards and forms contained in the CESR Protocol on MiFID Notifications (CESR/07-317c)? If not, what are the specific areas in the existing CESR standards requiring review and adjustment?

<ESMA_QUESTION_7>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_7>

2.3. Best execution - publication of data related to the quality of execution by trading venues for each financial instrument traded

Q8: Do you agree data should be provided by all the execution venues as set out in footnote 24? If not, please state why not.

<ESMA_QUESTION_8>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_8>

Q9: If you think that the different types of venues should not publish exactly the same data, please specify how the data should be adapted in each case, and the reasons for each adjustment.

<ESMA_QUESTION_9>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_9>

Q10: Should the data publication obligation apply to every financial instrument traded on the execution venue? Alternatively, should there be a minimum threshold of activity and, if so, how should it be defined (for example, frequency of trades, number of trades, turnover etc.)?

<ESMA_QUESTION_10>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_10>

Q11: How often should all execution data be published by trading venues? Is the minimum requirement specified in MiFID II sufficient, or should this frequency be increased? Is it reasonable or beneficial to require publication on a monthly basis and is it possible to reliably estimate the marginal cost of increased frequency?

<ESMA_QUESTION_11>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_11>

Q12: Please provide an estimate of the cost of the necessary IT development for the production and the publication of such reporting.

<ESMA_QUESTION_12>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_12>

Q13: Do you agree that trading venues should publish the data relating to the quality of execution with regard to a uniform reference period, with a minimum of specific reporting details and in a compatible format of data based on a homogeneous calculation method? If not, please state why.

<ESMA_QUESTION_13>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_13>

Q14: Is the volume of orders received and executed a good indicator for investment firms to compare execution venues? Would the VBBO in a single stock published at the same time also be a good indicator by facilitating the creation of a periodic European price benchmark? Are there other indicators to be considered?

<ESMA_QUESTION_14>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_14>

Q15: The venue execution quality reporting obligation is intended to apply to all MiFID instruments. Is this feasible and what differences in approach will be required for different instrument types?

<ESMA_QUESTION_15>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_15>

Q16: Do you consider that this requirement will generate any additional cost? If yes, could you specify in which areas and provide an estimation of these costs?

<ESMA_QUESTION_16>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_16>

Q17: If available liquidity and execution quality are a function of order size, is it appropriate to split trades into ranges so that they are comparable? How should they be defined (for example, as a percentage of the average trading size of the financial instrument on the execution venue; fixed ranges by volume or value; or in another manner)?

<ESMA_QUESTION_17>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_17>

Q18: Do you agree that a benchmark price is needed to evaluate execution quality? Would a depth-weighted benchmark that relates in size to the executed order be appropriate or, if not, could you provide alternative suggestions together with justification?

<ESMA_QUESTION_18>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_18>

Q19: What kind of cost should be reported (e.g. regulatory levies, taxes, mandatory clearing fees) and how should this data be presented to enable recipients to assess the total consideration of transactions?

<ESMA_QUESTION_19>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_19>

Q20: What would be the most appropriate way to measure the likelihood of execution in order to get useful data? Would it be a good indicator for likelihood of execution to measure the percentage of orders not executed at the end of the applicable trading period (for example the end of each trading day)? Should the modification of an order be taken into consideration?

<ESMA_QUESTION_20>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_20>

Q21: What would be the most appropriate way to measure the speed of execution in order to get useful data?

<ESMA_QUESTION_21>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_21>

Q22: Are there other criteria (qualitative or quantitative) that are particularly relevant (e.g. market structures providing for a guarantee of settlement of the trades vs OTC deals; robustness of the market infrastructure due to the existence of circuit breakers)?

<ESMA_QUESTION_22>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_22>

Q23: Is data on orders cancelled useful and if so, on what time basis should it be computed (e.g. within a single trading day)?

<ESMA_QUESTION_23>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_23>

Q24: Are there any adjustments that need to be made to the above execution quality metrics to accommodate different market microstructures?

<ESMA_QUESTION_24>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_24>

Q25: What additional measures are required to define or capture the above data and relevant additional information (e.g. depth weighted spreads, book depths, or others) How should the data be presented: on an average basis such as daily, weekly or monthly for each financial instrument (or on more than one basis)? Do you think that the metrics captured in the Annex to this chapter are relevant to European markets trading in the full range of MiFID instruments? What alternative could you propose?

<ESMA_QUESTION_25>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_25>

Q26: Please provide an estimate of the costs of production and publication of all of the above data and, the IT developments required? How could these costs be minimised?

<ESMA_QUESTION_26>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_26>

Q27: Would increasing the frequency of venue execution quality data generate additional costs for you? Would these costs arise as a result of an increase of the frequency of the review, or because this review will require additional training for your staff in order to be able to analyse and take into account these data? Please provide an estimate of these costs.

<ESMA_QUESTION_27>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_27>

Q28: Do you agree that investment firms should take the publication of the data envisaged in this Discussion Paper into consideration, in order to determine whether they represent a “material change”?

<ESMA_QUESTION_28>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_28>

2.4. Best execution - publication of data by investment firms

Q29: Do you agree that in order to allow clients to evaluate the quality of a firm’s execution, any proposed standards should oblige the firm to give an appropriate picture of the venues and the different ways they execute an order?

<ESMA_QUESTION_29>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_29>

Q30: Do you agree that when systematic internalisers, market makers, OTC negotiation or dealing on own account represent one of the five most important ways for the firm to execute clients’ orders, they should be incorporated in the reporting obligations under Article 27(6) of MiFID II?

<ESMA_QUESTION_30>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_30>

Q31: Do you think that the data provided should be different in cases when the firm directly executes the orders to when the firm transmits the orders to a third-party for execution? If yes, please indicate what the differences should be, and explain why.

<ESMA_QUESTION_31>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_31>

Q32: Do you consider that information on both directed and non-directed orders is useful? Should the data be aggregated so that both types of order are shown together or separated? Should there be a similar approach to disclosure of information on market orders versus limit orders? Do you think that another categorisation of client orders could be useful?

<ESMA_QUESTION_32>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_32>

Q33: Do you think that the reporting data should separate retail clients from other types of clients? Do you think that this data should be publicly disclosed or only provided to the NCA (e.g. when requested to assess whether there is unfair discrimination between retail clients and other categories)? Is there a more useful way to categorise clients for these purposes?

<ESMA_QUESTION_33>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_33>

Q34: Do you agree that the investment firms should publish the data relating to their execution of orders with regard to a uniform reference period, with a minimum of specific reporting details and in a compatible format of data based on a homogeneous calculation method? If not, please state why.

<ESMA_QUESTION_34>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_34>

Q35: What would be an acceptable delay for publication to provide the clients with useful data?

<ESMA_QUESTION_35>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_35>

Q36: What format should the report take? Should there be any difference depending on the nature of the execution venues (MTF, OTF, Regulated Market, systematic internalisers, own account) and, if so, could you specify the precise data required for each type?

<ESMA_QUESTION_36>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_36>

Q37: Do you agree that it is proportionate to require investment firms to publish on an annual basis a summary based on their internal execution quality monitoring of their top five execution venues in terms of trading volumes, subject to certain minimum standards?

<ESMA_QUESTION_37>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_37>

Q38: Do you have views on how 'directed orders' covered by client specific instructions should be captured in the information on execution quality? Is it possible to disaggregate reporting for directed orders from those for which there are no specific instructions and, if so, what the most relevant criteria would be for this exercise?

<ESMA_QUESTION_38>
TYPE YOUR TEXT HERE

<ESMA_QUESTION_38>

Q39: Minimum standards to ensure that the summary of the firm's internal execution quality monitoring of their top five execution venues (in terms of trading volumes) is comprehensive and contains sufficient analysis or context to allow it to be understood by market participants shall include the factors set out at paragraph 29. Do you agree with this analysis or are there any other relevant factors that should be considered as minimum standards for reporting?

<ESMA_QUESTION_39>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_39>

Q40: Can you recommend an alternative approach to the provision of information on execution quality obtained by investment firms, which is consistent with Article 27(6) of MiFID II and with ESMA's overall objective to ensure proportionate implementation?

<ESMA_QUESTION_40>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_40>

Q41: Do you agree that ESMA should try to limit the number of definitions of classes of instruments and provide a classification that can be used for the different reports established by MiFID and MiFIR?

<ESMA_QUESTION_41>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_41>

Q42: If this approach is not viable how should these classes be defined? What elements should be taken into consideration for that classification? Please explain the rationale of your classification. Is there a need to delay the publication of the reporting for particular class of financial instruments? If the schedule has to be defined, what timeframe would be the most relevant?

<ESMA_QUESTION_42>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_42>

Q43: Is any additional data required (for instance, on number of trades or total value of orders routed)?

<ESMA_QUESTION_43>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_43>

Q44: What information on conflicts of interest would be appropriate (inducements, capital links, payment for order flow, etc.)?

<ESMA_QUESTION_44>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_44>

3. Transparency

3.1. Pre-trade transparency - Equities

Q45: What in your view would be the minimum content of information that would make an indication of interest actionable? Please provide arguments with your answer.

<ESMA_QUESTION_45>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_45>

Q46: Do you agree with ESMA's opinion that Table 1 of Annex II of Regulation 1287/2006 is still valid for shares traded on regulated markets and MTFs? Please provide reasons for your answer.

<ESMA_QUESTION_46>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_46>

Q47: Do you agree with ESMA's view that Table 1 of Annex II of Regulation 1287/2006 is appropriate for equity-like instruments traded on regulated markets and MTFs? Are there other trading systems ESMA should take into account for these instruments? Please provide reasons for your answer.

<ESMA_QUESTION_47>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_47>

Q48: Do you agree with ESMA's view that ADT remains a valid measure for determining when an order is large in scale compared to normal market size? If not, what other measure would you suggest as a substitute or complement to the ADT? Please provide reasons for your answer.

<ESMA_QUESTION_48>
Yes, since the EBF is of the view that it is a well-functioning rule and therefore there is no need to change it.
<ESMA_QUESTION_48>

Q49: Do you agree that ADT should be used as an indicator also for the MiFIR equity-like products (depository receipts, ETFs and certificates)? Please provide reasons for your answers.

<ESMA_QUESTION_49>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_49>

Q50: Do you think there is merit in creating a new ADT class of 0 to €100,000 with an adequate new large in scale threshold and a new ADT class of €100,000 to €500,000? At what level should the thresholds be set? Please provide reasons for your answer.

<ESMA_QUESTION_50>
The EBF prefers to maintain the existing classes since we believe that adding the new ADT class is not necessary and additional complexity is added <ESMA_QUESTION_50>

Q51: Do you think there is merit in creating new ADT classes of €1 to €5m and €5 to €25m? At what level should the thresholds be set? Please provide reasons for your answer.

<ESMA_QUESTION_51>

No, the EBF does not think there are clear reasons to introduce the proposed changes

<ESMA_QUESTION_51>

Q52: Do you think there is merit in creating a new ADT class for ‘super-liquid’ shares with an ADT in excess of €100m and a new class of €50m to €100m? At what level should the thresholds be set?

<ESMA_QUESTION_52>

No.

<ESMA_QUESTION_52>

Q53: What comments do you have in respect of the new large in scale transparency thresholds for shares proposed by ESMA?

<ESMA_QUESTION_53>

The proposal will increase complexity and administrative burdens.

<ESMA_QUESTION_53>

Q54: Do you agree with the ADT ranges selected? Do you agree with the large in scale thresholds set for each ADT class? Which is your preferred option? Would you calibrate the ADT classes and related large in scale thresholds differently? Please provide reasons for your answers, including describing your own role in the market (e.g. market-maker, issuer etc).

<ESMA_QUESTION_54>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_54>

Q55: Which is your preferred scenario? Would you calibrate the ADT classes differently? Please provide reasons for your answers.

<ESMA_QUESTION_55>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_55>

Q56: Do you agree that the same ADT classes should be used for both pre-trade and post-trade transparency? Please provide reasons for your answers.

<ESMA_QUESTION_56>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_56>

Q57: How would you calibrate the large in scale thresholds for each ADT class for pre- and post-trade transparency? Please provide reasons for your answers.

<ESMA_QUESTION_57>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_57>

Q58: Do you agree with ESMA’s view that the large in scale thresholds (i.e. the minimum size of orders qualifying as large in scale and the ADT classes) should be subject to a review no earlier than two years after MiFIR and Level 2 apply in practice?

<ESMA_QUESTION_58>

No, two years is too late since there is a need to take into consideration what happens to financial instruments once they been deemed liquid and the effect it will have on the market place and its participants – “ready and willing buyers and seller” and liquidity providers.

There is a risk of getting the LIS wrong from the beginning. Hence flexibility during the first year is extremely important. European banks need to be able to adjust in order not to deteriorate liquidity.

<ESMA_QUESTION_58>

Q59: How frequently do you think the calculation per financial instrument should be performed to determine within which large in scale class it falls? Which combination of frequency and period would you recommend?

<ESMA_QUESTION_59>

Every 12 month, however there should be a list of events that triggers a recalculation alternatively the competent authority would be allowed to request recalculations

<ESMA_QUESTION_59>

Q60: Do you agree with ESMA’s opinion that stubs should become transparent once they are a certain percentage below the large in scale thresholds? If yes, at what percentage would you set the transparency threshold for large in scale stubs? Please provide reasons to support your answer.

<ESMA_QUESTION_60>

The EBF would prefer alternative (i), and thus the stub remains protected by the large in scale waiver. The reason is to ensure clear rules, avoiding unnecessary complexity is far more important than the very small additional value of transparency for the stubs.

In addition, European banks urge ESMA to ensure that block trades agreed as negotiated trades can continue to be executed as LIS, cf. ESMA’s previous approval in http://www.esma.europa.eu/system/files/2011-241_0.pdf.

The EBF believes that when calculating the volume cap for the NTW, orders - which are subject to Large in Scale thresholds (block trades) - should be excluded from the calculation of the volume cap. The reason is that it must be possible for investors to continue to be able to use their broker as an agent for large orders in liquid shares (at or above the LIS threshold) and report these trades within the NTW. There can often be investors who urgently need to trade a large amount of shares within a scheduled timeframe – but where the shares are not available at the RM or MTF. In those situations, the investor is dependent on the investment firm’s ability. These kinds of trades should still be possible to do via the NTW without being in the risk of being captured by the volume cap.

<ESMA_QUESTION_60>

Q61: Do you agree with ESMA’s view that the most relevant market in terms of liquidity should be the trading venue with the highest turnover in the relevant financial instrument? Do you agree with an annual review of the most relevant market in terms of liquidity? Please give reasons for your answer.

<ESMA_QUESTION_61>

No, the EBF believes the most relevant market in terms of liquidity should be the primary market

<ESMA_QUESTION_61>

Q62: Do you agree with ESMA’s view on the different ways the member or participant of a trading venue can execute a negotiated trade? Please give reasons for your answer.

<ESMA_QUESTION_62>

The EBF does not fully agree.

First of all, we understand that using the NTW is not connected with a requirement of price improvement, which is good (i.e. no change from today). As for the specific question, we agree with the proposed ways the member or participant of a trading venue can execute a negotiated trade, since these scenarios cover the relevant tasks.

Secondly, we refer to our response in Q60 for the calculation of the volume cap, where NTW trades larger than LIS should not be included in the calculations of the cap.

<ESMA_QUESTION_62>

Q63: Do you agree that the proposed list of transactions are subject to conditions other than the current market price and do not contribute to the price formation process? Do you think that there are other transactions which are subject to conditions other than the current market price that should be added to the list? Please provide reasons for your answer.

<ESMA_QUESTION_63>

The EBF does not fully agree.

While the EBF understands that the current list fits the actual reality, there might be other situations, which we have not thought of at this stage in time, which could be relevant to include. The EBF therefore suggests that there is a no exhaustive list

<ESMA_QUESTION_63>

Q64: Do you agree that these are the two main groups of order management facilities ESMA should focus on or are there others?

<ESMA_QUESTION_64>

Yes with the addition of “at-close”, “at-open” and “at call” orders.

<ESMA_QUESTION_64>

Q65: Do you agree with ESMA’s general assessment on how to design future implementing measures for the order management facility waiver? Please provide reasons for your answer.

<ESMA_QUESTION_65>

Yes, since ESMA’s generic approach is the most future proof.

<ESMA_QUESTION_65>

Q66: Are there other factors that need to be taken into consideration for equity-like instruments? Please provide reasons for your answer.

<ESMA_QUESTION_66>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_66>

Q67: Do you agree that the minimum size for a stop order should be set at the minimum tradable quantity of shares in the relevant trading venue? Please provide reasons for your answer.

<ESMA_QUESTION_67>

<ESMA_QUESTION_72>

Q73: Are there additional factors that need to be taken into consideration for equity-like instruments?

<ESMA_QUESTION_73>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_73>

3.2. Post-trade transparency - Equities

Q74: Do you agree that the content of the information currently required under existing MiFID is still valid for shares and applicable to equity-like instruments? Please provide reasons for your answer.

<ESMA_QUESTION_74>
Yes, it covers the information that is needed for investors to check the execution of their orders.
<ESMA_QUESTION_74>

Q75: Do you think that any new field(s) should be considered? If yes, which other information should be disclosed?

<ESMA_QUESTION_75>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_75>

Q76: Do you think that the current post-trade regime should be retained or that the identity of the systematic internaliser is relevant information which should be published? Please provide reasons for your response, distinguishing between liquid shares and illiquid shares.

<ESMA_QUESTION_76>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_76>

Q77: Do you agree with the proposed list of identifiers? Please provide reasons for your answer.

<ESMA_QUESTION_77>
We do not agree with the proposed list. Identifiers should be restricted to necessary information and there is no need for more granular identifiers.
<ESMA_QUESTION_77>

Q78: Do you think that specific flags for equity-like instruments should be envisaged? Please justify your answer.

<ESMA_QUESTION_78>
Same as Q 77: We do not agree with the proposed list. Identifiers should be restricted to necessary information and there is no need for more granular identifiers <ESMA_QUESTION_78>

Q79: Do you support the proposal to introduce a flag for trades that benefit from the large in scale deferral? Please provide reasons for your response.

<ESMA_QUESTION_79>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_79>

Q80: What is your view on requiring post-trade reports to identify the market mechanism, the trading mode and the publication mode in addition to the flags for the different types of transactions proposed in the table above? Please provide reasons for your answer.

<ESMA_QUESTION_80>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_80>

Q81: For which transactions captured by Article 20(1) would you consider specifying additional flags as foreseen by Article 20(3)(b) as useful?

<ESMA_QUESTION_81>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_81>

Q82: Do you agree with the definition of “normal trading hours” given above?

<ESMA_QUESTION_82>
TYPE YOUR TEXT HERE

<ESMA_QUESTION_82>

Q83: Do you agree with the proposed shortening of the maximum permissible delay to 1 minute? Do you see any reason to have a different maximum permissible deferral of publication for any equity-like instrument? Please provide reasons for your answer

<ESMA_QUESTION_83>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_83>

Q84: Should the deferred publication regime be subject to the condition that the transaction is between an investment firm dealing on own account and a client of the firm? Please provide reasons for your answer.

<ESMA_QUESTION_84>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_84>

Q85: Which of the two options do you prefer in relation to the deferral periods for large in scale transactions (or do you prefer another option that has not been proposed)? Please provide reasons for your answer

<ESMA_QUESTION_85>

We prefer option B, which is more flexible for firms executing large trades late in the trading day (particular in illiquid stocks).

<ESMA_QUESTION_85>

Q86: Do you see merit in adding more ADT classes and adjusting the large in scale thresholds as proposed? Please provide alternatives if you disagree with ESMA's proposal

<ESMA_QUESTION_86>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_86>

Q87: Do you consider the thresholds proposed as appropriate for SME shares?

<ESMA_QUESTION_87>

<ESMA_QUESTION_93>

Q94: What are your views regarding how financial instruments should be grouped into classes and/or how the standard market size for each class should be established for certificates and exchange traded funds?

<ESMA_QUESTION_94>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_94>

3.4. Trading obligation for shares (Article 23, MiFIR)

Q95: Do you consider that the determination of what is non-systematic, ad-hoc, irregular and infrequent should be defined within the same parameters applicable for the systematic internaliser definition? In the case of the exemption to the trading obligation for shares, should the frequency concept be more restrictive taking into consideration the other factors, i.e. ‘ad-hoc’ and ‘irregular’?

<ESMA_QUESTION_95>

No, the EBF does not agree. It is not clear to the Federation why ESMA is investigating these questions since we have understood from the level 1 text that ESMA is not requested to submit draft regulatory technical standard on these topics.

<ESMA_QUESTION_95>

Q96: Do you agree with the list of examples of trades that do not contribute to the price discovery process? In case of an exhaustive list would you add any other type of transaction? Would you exclude any of them? Please, provide reasons for your response.

<ESMA_QUESTION_96>

No, the EBF does not agree. Actually, there are more types of activity, present and not certain on future where it is not defined, like options maturity and or option exercises. The EBF calls on ESMA to define clearly what a price formation process is in order to identify which trade do not impact the price discovery process and therefore could take place pure OTC. However, the EBF calls on ESMA not to create an exhaustive list. There are undoubtedly other types of transactions (e.g. primary market transactions in connection with the issuance of shares, including the underwriting of an issue, large-scale acquisitions/sales by an investment firm in the secondary market on behalf of an investor).

<ESMA_QUESTION_96>

Q97: Do you consider it appropriate to include benchmark and/or portfolio trades in the list of those transactions determined by factors other than the current valuation of the share? If not, please provide an explanation with your response.

<ESMA_QUESTION_97>

Yes, the EBF agrees. <ESMA_QUESTION_97>

3.5. Introduction to the non-equity section and scope of non-equity financial instruments

Q98: Do you agree with the proposed description of structured finance products? If not, please provide arguments and suggestions for an alternative.

<ESMA_QUESTION_98>

Yes, the EBF agrees with the proposed definition of structured finance products.

<ESMA_QUESTION_98>

Q99: For the purposes of transparency, should structured finance products be identified in order to distinguish them from other non-equity transferable securities? If so, how should this be done?

<ESMA_QUESTION_99>

In the opinion of EBF, if the instruments are divided into separate classes (COFIA), structured finance products should have their own asset class. If IBIA, there is no issue.

<ESMA_QUESTION_99>

Q100: Do you agree with the proposed explanation for the various types of transferable securities that should be treated as derivatives for pre-trade and post trade transparency? If not, please provide arguments and suggestions for an alternative.

<ESMA_QUESTION_100>

No, the EBF does not agree. Securitised derivatives are a sub-class of bonds and have to be classified accordingly. Only this approach properly reflects usage of trading and legal classification. Securitised derivatives should be treated as bonds, for the same reasons as convertible bonds are treated as bonds (see point 16 on page 108 in DP).

Another element, not directly linked to transparency purposes, raised the attention of the EBF and should, in its view, be modified: in §37, the trading obligation under Article 28 of MiFIR is said to concern “securitised derivatives and derivative contracts”, which is inconsistent with the aforementioned provision. In short, level I text makes it crystal clear that the trading obligation applies to those derivatives that pass certain tests in terms of (i) being subject to EMIR clearing obligation and (ii) being “sufficiently” liquid (at least up to a certain size) and (iii) being traded at least on one trading venue.

Since securitised derivatives do not pass the EMIR clearing obligation test, they cannot be subject to the trading obligation. As a consequence, securitised derivatives systematically benefit from the pre-trade transparency exemption exposed in Article 9.1.(c).

<ESMA_QUESTION_100>

Q101: Do you agree with ESMA’s proposal that for transparency purposes market operators and investment firms operating a trading venue should assume responsibility for determining to which MiFIR category the non-equity financial instruments which they intend to introduce on their trading venue belong and for providing their competent authorities and the market with this information before trading begins?

<ESMA_QUESTION_101>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_101>

Q102: Do you agree with the definitions listed and proposed by ESMA? If not, please provide alternatives.

<ESMA_QUESTION_102>

In addition to the ESMA’s proposals, the category sovereign bonds must include:

1. Explicitly government guaranteed bonds
2. Municipality bonds providing government support for the sector

In addition, we would like to underline that the EBF supports the clarification of §28 concerning the notion of certificates. In our view, the category designated as certificates in the level 1 (translated by “certificats préférentiels” in French), and associated with the equity universe, should only concern a reduced number of instruments (notably Spanish *participaciones preferentes*) and certainly not securities with a subordinated element, such as redeemable subordinated notes or contingent convertibles (CoCo), which by nature are closer to the non-equity universe and should in our view be submitted to the same regime.

Their integration in the equity regime for transparency purposes would have detrimental effects by diverting traditional investors in bonds without attracting investors in shares, whose trading activity, in any case, has less depth. The consequences on the markets of these products of an integration to the equity regime would be serious for the bank industry, for which these instruments play an important role in recapitalisation.

<ESMA_QUESTION_102>

3.6. Liquid market definition for non-equity financial instruments

Q103: Do you agree with the proposed approach? If you do not agree please provide reasons for your answers. Could you provide for an alternative approach?

<ESMA_QUESTION_103>

Considering the given options, the EBF takes the view that Option 3 is preferable.

However, it is imperative that ESMA, when developing the new transparency regime for non-equities, takes into account that the new rules will have an ex post effect on the liquidity, e.g. on the frequency of trades.

The EBF strongly support ESMA's notion in point 9 of page. 117 that the guiding principle for the calibration should be based on promotion of efficient functioning of markets. As rightly noted, if illiquid locally or regionally traded non-equity instruments (notably bonds) are artificially calibrated as liquid, this would have highly detrimental effects on liquidity and further to financing of real economy. The Federation therefore suggests that a step by step approach combined with a capacity to move rapidly the cursors if it is proved that the market structure is not satisfactory is introduced. This step by step approach has been implemented in other types of EU legislation such as the CRD IV where the due care has been given to the fact that an extreme rapid change would have damage the whole banking system.

<ESMA_QUESTION_103>

Q104: Do you agree with the proposed approach? If you do not agree please provide reasons. Could you provide an alternative approach?

<ESMA_QUESTION_104>

In the opinion of EBF, in order to get a clear picture of the market both average trade value (notional) and average daily turnover should be used

<ESMA_QUESTION_104>

Q105: Do you agree with the proposed approach? If you do not agree please provide reasons. Could you provide an alternative approach?

<ESMA_QUESTION_105>

No, the EBF does not agree with the proposed approach by ESMA. There is a lack of transparency of the data used which makes ESMA's proposals difficult to evaluate. The EBF generally questions using liquidity provider as a proxy for liquidity.

<ESMA_QUESTION_105>

Q106: Do you agree with the proposed approach? If you do not agree please provide reasons. Could you provide an alternative approach?

<ESMA_QUESTION_106>

The EBF does not fully agree.

The Federation welcomes ESMA's approach to only use publically available spreads. However, those spreads should only be used where it is clear they are generated from actual transactions (as opposed to indicative or composite measures).

<ESMA_QUESTION_106>

Q107: Should different thresholds be applied for different (classes of) financial instruments? Please provide proposals and reasons.

<ESMA_QUESTION_107>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_107>

Q108: Do you have any proposals for appropriate spread thresholds? Please provide figures and reasons.

<ESMA_QUESTION_108>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_108>

Q109: How could the data necessary for computing the average spreads be obtained?

<ESMA_QUESTION_109>

In the opinion of EBF, this information could be obtained from vendors, given that they can certify live prices and volumes.

<ESMA_QUESTION_109>

Q110: Do you agree with the proposed approach? If you do not agree please provide reasons for your answer. Could you provide an alternative approach?

<ESMA_QUESTION_110>

The EBF supports Option 1.

However, one just cannot ignore the fact that if ESMA can't get hold of accurate spread data that fulfils its requirement it can disregard it. The reason for not being able to obtain the data is likely to be because the class/instrument is illiquid. If the other measures points to a possible ex-ante "liquid" class/instrument, but the one omitted clearly don't, then ESMA will classify Class/instrument on wrong assumptions. The EBF believes that if there is no data available for one criterion, this fact is a strong sign that the instrument actually is illiquid.

<ESMA_QUESTION_110>

Q111: Overall, could you think of an alternative approach on how to assess whether a market is liquid bearing in mind the various elements of the liquid market definition in MiFIR?

<ESMA_QUESTION_111>

Yes, building on the very important statement in 3.8 point 9, i.e. that the rules shall be calibrated in order to avoid that the increase in transparency further deteriorates liquidity. This is in the opinion of EBF crucial for many markets where liquidity is dependent on ability/willingness of liquidity providers/SIs to trade against their own balance sheet. If rules are not properly calibrated and account taken of ex post effects, liquidity providers may withdraw from markets. (See also replies to Q 103 and article art 32.3 second paragraph MiFIR.)

<ESMA_QUESTION_111>

Q112: Which is your preferred scenario or which combination of thresholds would you propose for defining a liquid market for bonds or for a sub-category of bonds (sovereign, corporate, covered, convertible, etc.)? Please provide reasons for your answer.

<ESMA_QUESTION_112>

The EBF considers it absolutely necessary that ESMA ensures that parameters are set in such a way that only truly liquid instruments are qualified as such. We cannot follow ESMA's analysis and we call on ESMA to give more insight into their calculations. We consider a calibration of ESMA's thresholds essential.

<ESMA_QUESTION_112>

Q113: Should the concept of liquid market be applied to financial instruments (IBIA) or to classes of financial instruments (COFIA)? Would be appropriate to apply IBIA for certain asset classes and COFIA to other asset classes? Please provide reasons for your answers

<ESMA_QUESTION_113>

It is essential that financial instruments are correctly classified as "liquid" or "non-liquid". It must be avoided in any case that an instrument that is not liquid is qualified as liquid. Otherwise, transparency

obligations would apply to non-liquid instruments, i.e. SIs would have to be subject to undue risk. The liquidity of the market would dry up.

The EBF agrees that for derivatives, COFIA should be used. For bonds we take the view that IBIA would be a more precise method. COIFA for bonds could only be acceptable provided that the sub-classes are created by taking into account relevant factors so that they reflect true liquidity.

Moreover, we would like to draw ESMA's attention to that many problems that arise from COFIA stem from the fact that a class of securities has totally different liquidity and issuing patterns across EU's different currency areas.

<ESMA_QUESTION_113>

Q114: Do you have any (alternative) proposals how to take the 'range of market conditions and the life-cycle' of (classes of) financial instruments into account - other than the periodic reviews described in the sections periodic review of the liquidity threshold and periodic assessment of the liquidity of the instrument class, above?

<ESMA_QUESTION_114>

The liquidity thresholds should be reviewed (but not necessarily changed) on an annual basis. The assessment of whether a class or instrument is/remains liquid/illiquid should be quarterly on the basis of a one year look back.

<ESMA_QUESTION_114>

Q115: Do you have any proposals on how to form homogenous and relevant classes of financial instruments? Which specifics do you consider relevant for that purpose? Please distinguish between bonds, SFPs and (different types of) derivatives and across qualitative criteria (please refer to Annex 3.6.1).

<ESMA_QUESTION_115>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_115>

Q116: Do you think that, in the context of the liquidity thresholds to be calculated under MiFID II, the classification in Annex 3.6.1 is relevant? Which product types or sub-product types would you be inclined to create or merge? Please provide reasons for your answers

<ESMA_QUESTION_116>

Firstly, the EBF notes that municipal bonds are treated as a separate class in this chapter which was not the case in 3.5 of the DP. Municipal bonds with government backing should fall within category sovereign bonds. Secondly, we want to underline that in the context of MIFID II the classification can be relevant given that currency is a very high level denominator in the categorisation of (classes of) securities.

<ESMA_QUESTION_116>

Q117: Do you agree with the proposed approach? If not, please provide rationales and alternatives.

<ESMA_QUESTION_117>

Yes, the EBF agrees with the proposed approach, provided some flexibility is left for more action in certain circumstances.

Additionally, it is essential that SIs are not obliged to quote in markets where liquidity has dried up.

<ESMA_QUESTION_117>

Q118: Do you agree with the proposed thresholds? If not, please provide rationales and alternatives.

<ESMA_QUESTION_118>

In EBF's view, recalibration every 2 years and then fixing a percentages a hard threshold will not work in practice. Markets traded on a venue should have open dialogue with ESMA and any percentage should be used as indications.

<ESMA_QUESTION_118>

3.7. Pre-trade transparency requirements for non-equity instruments

Q119: Do you agree with the description of request-for-quote system? If not, how would you describe a request-for-quote system? Please give reasons to support your answer.

<ESMA_QUESTION_119>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_119>

Q120: Do you agree with the inclusion of request-for-stream systems in the definition of request-for-quote system? Please give reasons to support your answer.

<ESMA_QUESTION_120>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_120>

Q121: Do you think that – apart from request-for-stream systems – other functionalities should be included in the definition of request-for-quote system? If yes, please provide a description of this functionality and give reasons to support your answer.

<ESMA_QUESTION_121>

No

<ESMA_QUESTION_121>

Q122: Do you agree with the description of voice trading system? If not, how would you describe a voice trading system?

<ESMA_QUESTION_122>

No, the EBF does not agree with the description of voice trading system as we consider it too extensive. The level 1 text uses the expression "voice trading system" in conjunction with "trading venues", which have a multilateral character according to MiFID. As a consequence, a voice trading system should clearly possess a multilateral character.

Hence, the description should be: "A multilateral trading system where transactions between members are arranged through voice negotiation".

<ESMA_QUESTION_122>

Q123: Do you agree with the proposed table setting out different types of trading systems for non-equity instruments?

<ESMA_QUESTION_123>

No, the EBF takes the view that it should be made more specific that voice trading systems are not supposed to make public the information on bids and offers for orders subject to waivers. Response to Q122 also proposes a different definition for voice trading systems.

<ESMA_QUESTION_123>

Q124: Do you think that the information to be made public for each type of trading system provides adequate transparency for each trading system?

<ESMA_QUESTION_124>

Yes apart from:

1. RFQ - where info regarding volume is only available if the security is traded on a venue and this info comes from that venue.
2. “Trading system not covered by” – For these types of trading the definition of what should be revealed could wait.
3. See the comments made on the voice trading system – Q123

<ESMA_QUESTION_124>

Q125: Besides the trading systems mentioned above, are there additional trading models that need to be considered for pre-trade transparency requirements in the non-equity market space?

<ESMA_QUESTION_125>

No.

<ESMA_QUESTION_125>

Q126: If you think that additional trading systems should be considered, what information do you think should be made public for each additional type of trading model?

<ESMA_QUESTION_126>

In the opinion of EBF, no more information should be made public.

<ESMA_QUESTION_126>

Q127: Based on your experience, what are the different types of voice trading systems in the market currently? What specific characteristics do these systems have?

<ESMA_QUESTION_127>

The EBF would like to clarify that different EU markets have different types of voice trading system and therefore in line with MiFIR Article 9(5), the EBF calls on ESMA to ensure that the pre trade transparency regime should be calibrated for different types of trading system – for example pre trade transparency should be delayed while the bids and offers are still actionable.

The EBF has collected the following cases/examples of types of voice trading systems:

- In the Nordic area most are pure voice trading – maybe connected with chat rooms. On NASDAQ OMX you find Electrobroker (voice broking supplemented with transparent bid and offers for some instruments). In general, there is very limited pre-trade transparency which again is not necessary for involved parties since they are all liquidity providers and not end users
- In France, the only type of systems which would obey to this description is the open outcry auction system, which still exists on some markets.

<ESMA_QUESTION_127>

Q128: How do these voice trading systems currently make information public or known to interested parties at the pre-trade stage?

<ESMA_QUESTION_128>

The EBF has asked its members how these voice trading systems work in their national markets. In the Nordic area, they have chat boxes or indicative screens. Please observe they are servicing sell-side liquidity providers and are there as a tool for liquidity providers to adjust their risk without revealing identity since that might affect counterparties (other liquidity providers’ propensity to trade).

<ESMA_QUESTION_128>

Q129: Do you agree with ESMA's approach in relation to the content, method and timing of pre-trade information being made available to the wider public?

<ESMA_QUESTION_129>

The EBF agrees with ESMA's approach as far as it is confined with the type of markets described in Q128 and Q127

<ESMA_QUESTION_129>

Q130: Do you agree with the above mentioned approach with regard to indicative pre-trade bid and offer prices which are close to the price of the trading interests? Please give reasons to support your answer

<ESMA_QUESTION_130>

Yes

<ESMA_QUESTION_130>

Q131: If you do not agree with the approach described above please provide an alternative

<ESMA_QUESTION_131>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_131>

3.8. Post-trade transparency requirements for non-equity instruments

Q132: Do you agree with the proposed content of post-trade public information? If not, please provide arguments and suggestions for an alternative.

<ESMA_QUESTION_132>

No, the EBF does not agree. As regards the content of the post-trade information we do not support requirements of venue or SI identification

<ESMA_QUESTION_132>

Q133: Do you think that the current post-trade regime for shares on the systematic internaliser's identity should be extended to non-equity instruments or that the systematic internaliser's identity is relevant information which should be published without exception?

<ESMA_QUESTION_133>

The current post-trade regime for shares does not require the publication of the SI's identity and therefore the EBF thinks that the current post-trade regime for shares on the SI's identity should be extended to non-equity instruments. This extension implies that the SI's identity should **not** be made public since it would create undue risk for the SI.

<ESMA_QUESTION_133>

Q134: Is there any other information that would be relevant to the market for the above mentioned asset classes?

<ESMA_QUESTION_134>

No, the EBF thinks it is sufficient with actual fields.

<ESMA_QUESTION_134>

Q135: Do you agree with the proposed table of identifiers for transactions executed on non-equity instruments? Please provide reasons for your answer.

<ESMA_QUESTION_135>

No, the EBF does not agree with the proposed table of identifiers. Neither do we think that they would be relevant for the public nor that they could support the efficiency of price discovery. For supervisory tasks, NCAs will receive all information necessary via transaction reports; therefore the NCAs do not depend on post-trade transparency information.

<ESMA_QUESTION_135>

Q136: Do you support the use of flags to identify trades which have benefitted from the use of deferrals? Should separate flags be used for each type of deferral (e.g. large in scale deferral, size specific to the instrument deferral)? Please provide reasons for your answer.

<ESMA_QUESTION_136>

No, the EBF questions the use of flags to identify trades which have benefitted from the use of deferrals, since reporting through APAs should have already compiled the trading time and the time when the transaction was reported.

<ESMA_QUESTION_136>

Q137: Do you think a flag related to coupon payments (ex/cum) should be introduced? If yes, please describe the cases where such flags would be warranted and which information should be captured.

<ESMA_QUESTION_137>

No, the EBF does not think it is necessary to introduce them.

<ESMA_QUESTION_137>

Q138: Do you think that give-up/give-in trades (identified with a flag) should be included in post-trade reports or not made public? Please provide reasons for your answers.

<ESMA_QUESTION_138>

No, the EBF does not see any use in these data. Give-up/give-in trades do not contribute to the price formation process and should therefore not be included in the post-trade regime.

<ESMA_QUESTION_138>

Q139: Do you agree that securities financing transactions should be exempted from the post-trade transparency regime?

<ESMA_QUESTION_139>

Yes, the EBF takes the view that securities financing transactions should be exempted from the post-trade transparency regime because those transactions don't help to the price formation process and don't provide any kind of liquidity to the market.

<ESMA_QUESTION_139>

Q140: Do you agree that for the initial application of the new transparency regime the information should be made public within five minutes after the relevant non-equity transaction? Please provide reasons for your answer.

<ESMA_QUESTION_140>

No, the EBF does not agree. The EBF believes that the time of publication is a crucial factor to reach the goals of Post Transparency regime. In that sense, and taking into account that a significant proportion of non-equity transactions are carried out on trading systems which rely on manual functionalities, we consider 15 minutes to make public the trade date could be a first and reasonable time period to comply with such obligations.

<ESMA_QUESTION_140>

Q141: Do you agree with the proposed text or would you propose an alternative option? Please provide reasons for your answer.

<ESMA_QUESTION_141>

No, the EBF does not agree. It is difficult for the EBF at this stage to provide an alternative option but we will work to further explore this issue in the second round of consultations. Additionally, the question is not clear cut since the reference to the text remains too vague. The EBF calls on ESMA to clarify this in the Consultation Paper.

On a general note, we disagree with ESMA that the aim of the regulation should be to achieve harmonization between the transparency regime for equities and non-equities. In our opinion, the aim of the regulation is to adopt well-suited rules for non-equity markets in the EU, based on the characteristics of the instruments, trading patterns and market structures - not to copy existing rules for the equities markets which have totally different needs. Such an approach also ignores the clear statements in the level 1 text regarding calibration, taking into account the needs of issuers, investors and the market liquidity (e.g. recital 16 MiFIR). ESMA should take due care when developing these rules on transparency so as not to damage the real economy.

<ESMA_QUESTION_141>

Q142: Do you agree that the intra-day deferral periods should range between 60 minutes and 120 minutes?

<ESMA_QUESTION_142>

No, the EBF does not think that the proposed deferral periods are sufficient. They should be significantly longer both for liquid and illiquid instruments. It should be noted that the longest deferral periods for equities – a significantly more liquid asset class per se – under MiFID I is three days (even for liquid shares). The calibration for non-equity instruments needs to proceed on a much more cautious basis given the unknown impacts on liquidity.

<ESMA_QUESTION_142>

Q143: Do you agree that the maximum deferral period, reserved for the largest transactions, should not exceed end of day or, for transactions executed after 15.00, the opening of the following trading day? If not, could you provide alternative proposals? Please provide reasons for your answer.

<ESMA_QUESTION_143>

No, the EBF does not think that the proposed deferral periods are sufficient. They should be significantly longer both for liquid and illiquid instruments. The exact time of deferral is difficult to establish at this point of time as it depends on different market needs and the type of non-equity instrument being traded. EBF members will study it and come back to ESMA on the second round of consultations.

<ESMA_QUESTION_143>

Q144: Do you consider there are reasons for applying different deferral periods to different asset classes, e.g. fixing specific deferral periods for sovereign bonds? Please provide arguments to support your answer.

<ESMA_QUESTION_144>

No. Asset class is not the right approach, it all depends on liquidity. Moreover, the concept of liquidity has to be further developed and described at an asset class level. Deferral will depend on liquidity and liquidity will depend on different aspects (number of venues providing prices, size of issuance, number of liquidity providers, rating of bonds, currency). Also a sub asset class would be welcomed (i.e. if within an asset class (government bonds) there exists a liquid futures market that provides possibility of hedging, the need for deferral could be different than a government bond without futures market).

<ESMA_QUESTION_144>

Q145: Do you support the proposal that the deferral for non-equity instruments which do not have a liquid market should be until the end of day + 1? Please provide reasons for your answer.

<ESMA_QUESTION_145>

No, the EBF supports longer deferral period non-liquid instrument. However the EBF finds it difficult at this stage to retain one single option (EOD +1) for deferral or to totally exclude it as there are more nuances for a similar pattern. The Federation will explore it and try to comment on the second round of consultations on the exact time of deferral.

<ESMA_QUESTION_145>

Q146: Do you think that one universal deferral period is appropriate for all non-equity instruments which do not have a liquid market or that the deferrals should be set at a more granular level, depending on asset class and even sub asset class. Please provide reasons for your answer.

<ESMA_QUESTION_146>

The EBF considers that each asset class or sub asset must have its own deferral period. Asset classes have different degrees of liquidity not necessarily the same in a given asset class.

<ESMA_QUESTION_146>

Q147: Do you agree with the proposal that during the deferred period for non-equity instruments which do not have a liquid market, the volume of the transaction should be omitted but all the other details of individual transactions must be published? Please provide reasons for your answer.

<ESMA_QUESTION_147>

No, the EBF does not agree. During the deferred period, the EBF has the view that no details should be published, because of pre trade transparency market will be aware of the transaction for a particular instrument.

Publication of volume during the deferral period would then expose the liquidity providers to undue risks insofar the public can see the transaction and know it is large. This is essential point for all markets dependent on liquidity providers. It is totally unreasonable that liquidity providers should take more undue risk in the bond market than in the equity market.

<ESMA_QUESTION_147>

Q148: Do you agree that publication in an aggregated form with respect to sovereign debt should be authorised for an indefinite period only in limited circumstances? Please give reasons for your answers. If you disagree, what alternative approaches would you propose?

<ESMA_QUESTION_148>

No, aggregated publication should be given special treatment for different types of non-equity instruments were the size has been relevant enough. EBF does not consider that aggregation should only be available in limited circumstances as proposed by ESMA in the DP.

<ESMA_QUESTION_148>

Q149: In your view, which criteria and/or conditions would it be appropriate to specify as indicating there is a need to authorise extended/indefinite deferrals for sovereign debt??

<ESMA_QUESTION_149>

There is no legal basis on level 1 that aggregation or extended/indefinite should only be available in extraordinary situations. Moreover, art 11.3 c MiFIR is also clear that extended deferral shall be available for other instruments than sovereign debt. Please also note that extended and indefinite deferrals should be

able to be granted by NCAs due to local market structure taking into account the interests of issuers and investors (see recital 16 MiFIR).

<ESMA_QUESTION_149>

Q150: In your view, could those transactions determined by other factors than the valuation of the instrument be authorised for deferred publication to the end of day? Please provide reasons for your answer.

<ESMA_QUESTION_150>

TYPE YOUR TEXT HERE

<ESMA_QUESTION_150>

3.9. The transparency regime of non-equity large in scale orders and transactions

Q151: Do you agree with the proposed option? Which option would be more suitable for the calibration of the large in scale requirements within an asset class?

<ESMA_QUESTION_151>

Option 2 is favored by the EBF. However it implies very high requirements on calibrated sub-classes. If Option 2 is chosen by ESMA it is imperative that experts from the industry are very closely involved in determining sub-classes.

<ESMA_QUESTION_151>

Q152: Do you consider there are reasons for opting for different options for different asset classes? Please provide arguments.

<ESMA_QUESTION_152>

No, if grouping of products into sub classes is sufficiently granular and delays are sensibly long.

<ESMA_QUESTION_152>

Q153: Do you agree that the choice between the two options should be consistent with the approach adopted for the assessment of liquidity? If not, please provide arguments.

<ESMA_QUESTION_153>

Yes

<ESMA_QUESTION_153>

Q154: Do you agree with the proposed approach? If no, which indicator would you consider more appropriate for the determination of large in scale thresholds for orders and transactions?

<ESMA_QUESTION_154>

The EBF believes that both average trade value (notional) and average daily turnover should be used when determining the LSW.

<ESMA_QUESTION_154>

Q155: Do you agree that the proxy used for the determining the large in scale thresholds should be the same as the one used to assess the average size of transactions in the context of the definition of liquid markets? Please provide arguments.

<ESMA_QUESTION_155>

Yes, a proxy makes the LIS simpler to apply.

<ESMA_QUESTION_155>

Q156: In your view, which option would be more suitable for the determination of the large in scale thresholds? Please provide arguments.

<ESMA_QUESTION_156>

The EBF prefers Option 1 which would be more suitable for the determination of the large in scale thresholds. The thresholds should be defined directly without complex policy oriented methods.

<ESMA_QUESTION_156>

Q157: Alternatively which method would you suggest for setting the large in scale thresholds?

<ESMA_QUESTION_157>

<ESMA_QUESTION_157>

Q158: In your view, should large in scale thresholds for orders differ from the large in scale thresholds for transactions? If yes, which thresholds should be higher: pre-trade or post-trade? Please provide reasons to support your answer.

<ESMA_QUESTION_158>

The same thresholds should apply since it will be simpler.

<ESMA_QUESTION_158>

Q159: Do you agree that the large in scale thresholds should be computed only on the basis of transactions carried out on trading venues following the implementation of MiFID II? Please, provide reasons for the answer.

<ESMA_QUESTION_159>

Yes, for instruments which are traded on venues.

<ESMA_QUESTION_159>

Q160: Do you think that the condition for deferred publication of large in scale transactions currently applying to shares (transaction is between an investment firm that deals on own account and a client of the investment firm) is applicable to non-equity instruments? Please provide reasons for your answer.

<ESMA_QUESTION_160>

LIS transactions shall always be deferred.

<ESMA_QUESTION_160>

Q161: Do you agree that the large in scale regime should be reviewed no earlier than two years after application of MiFIR in practice?

<ESMA_QUESTION_161>

No

1. You need to take into consideration what happens to (classes of) financial instruments once they been deemed liquid and the effect it will have on the market place and its participants – “ready and willing buyers and seller” and liquidity providers. This then includes the LIS issue.

2. Getting the LIS wrong from the start is likely to happen, because the ex-ante anticipation effect on regulatory changes is extremely hard to get right. Hence flexibility during the first year is extremely important. We need to be able to adjust in order not to deteriorate liquidity. At least for smaller currency areas.

<ESMA_QUESTION_161>

3.10. Size specific to the instrument

Q162: Do you agree with the above description of the applicability of the size specific to the instrument? If not please provide reasons for your answer.

<ESMA_QUESTION_162>

We agree with the points made in points 5-7.

<ESMA_QUESTION_162>

Q163: Do you agree with the proposal that the size specific to the instrument should be set as a percentage of the large in scale size? Please provide reasons for you answer.

<ESMA_QUESTION_163>

No, the EBF does not agree.

First of all, from a practical point of view the EBF observes that ESMA's the proposal is very difficult to assess due to a lack of data.

Secondly, from a more general point of view, it has to be pointed out that LIS and Size specific to the instrument (SSI) are not two percentage measurements of one average liquidity measure. In fact, the SSI was inserted in level 1 in order to adjust (calibrate) the post trade transparency regime to the structure of particular markets taking into account the liquidity providers ability to hedge and the type of market participants. It is not at all the same concept as LIS, which is applicable to all types of (classes of) financial instruments and their markets. Thus, we strongly disagree with the assumptions made by ESMA on page 105 point 6 iii. In addition, as regards SI obligations, the aim with the SSI was also to introduce similar to "standard market size" i.e. to have a retail threshold above which the obligations should not apply. Therefore, by setting SSI as a percentage of LIS, there is a risk that the regulatory aims with the size specific threshold will not be achieved.

However, should ESMA decide on a threshold for the SSI as a percentage of LIS, it is important to make such a rule operational, taking into account the aims mentioned above. In particular, the EBF would like to stress that the percentage would have to be set very low (one digit number, maybe even below 1 %).

<ESMA_QUESTION_163>

Q164: In your view, what methodologies would be most appropriate for measuring the undue risk in order to set the size specific threshold?

<ESMA_QUESTION_164>

The EBF believes that average order sizes of retail investors could be used as a proxy to set the size specific threshold.

Another (or complementary) solution would be to determine the retail size by looking at the prospectus requirements e.g. nominal amount of 100 000 EUR. (It should be noted that a limit of 100 000 EUR was also the proposal by the European Parliament in its final report.) This solution has the benefit of working also for those non-equity markets where no retail investors are active.

<ESMA_QUESTION_164>

Q165: Would you suggest any other practical ways in which ESMA could take into account whether, at such sizes, liquidity providers would be able to hedge their risks?

<ESMA_QUESTION_165>

No. Hedging is a model-dependent expression where one liquidity provider might believe they are hedged with a certain position while another doesn't. ESMA cannot define whether an exposure is adequately hedged.

<ESMA_QUESTION_165>

Q166: Do you agree with ESMA's description of how the size specific to the instrument waiver would interact with the large in scale waiver? Please provide reasons for your answer.

<ESMA_QUESTION_166>

<ESMA_QUESTION_322>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_322>

Q323: Do you agree that and OTR must be complemented with a penalty fee?

<ESMA_QUESTION_323>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_323>

Q324: In terms of the approach to determine the penalty fee for breaching the OTR, which approach would you prefer? If neither of them are satisfactory for you, please elaborate what alternative you would envisage.

<ESMA_QUESTION_324>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_324>

Q325: Do you agree that the observation period should be the same as the billing period?

<ESMA_QUESTION_325>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_325>

Q326: Would you apply economic penalties only when the OTR is systematically breached? If yes, how would you define “systematic breaches of the OTR”?

<ESMA_QUESTION_326>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_326>

Q327: Do you consider that market makers should have a less stringent approach in terms of penalties for breaching the OTR?

<ESMA_QUESTION_327>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_327>

Q328: Please indicate which fee structure could incentivise abusive trading behaviour.

<ESMA_QUESTION_328>

TYPE YOUR TEXT HERE
<ESMA_QUESTION_328>

Q329: In your opinion, are there any current fee structures providing these types of incentives? Please elaborate.

<ESMA_QUESTION_329>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_329>

4.8. Tick sizes (Article 48(6) and Article 49 of MiFID II)

Q330: Do you agree with the general approach ESMA has suggested?

<ESMA_QUESTION_330>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_330>

Q331: Do you agree with adopting the average number of daily trades as an indicator for liquidity to satisfy the liquidity requirement of Article 49 of MiFID II? Are there any other methods/liquidity proxies that allow comparable granularity and that should be considered?

<ESMA_QUESTION_331>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_331>

Q332: In your view, what granularity should be used to determine the liquidity profile of financial instruments? As a result, what would be a proper number of liquidity bands?

<ESMA_QUESTION_332>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_332>

Q333: What is your view on defining the trade-off between constraining the spread without increasing viscosity too much on the basis of a floor-ceiling mechanism?

<ESMA_QUESTION_333>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_333>

Q334: What do you think of the proposed spread to tick ratio range?

<ESMA_QUESTION_334>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_334>

Q335: In your view, for the tick size regime to be efficient and appropriate, should it rely on the spread to tick ratio range, the evolution of liquidity bands, a combination of the two or none of the above?

<ESMA_QUESTION_335>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_335>

Q336: What is your view regarding the common tick size table proposed under Option 1? Do you consider it easy to read, implement and monitor? Does the proposed two dimensional tick size table (based on both the liquidity profile and price) allow applying a tick size to a homogeneous class of stocks given its clear-cut price and liquidity classes?

<ESMA_QUESTION_336>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_336>

Q337: What is your view regarding the determination of the liquidity and price classes?

<ESMA_QUESTION_337>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_337>

Q338: Considering that market microstructure may evolve, would you favour a regime that allows further calibration of the tick size on the basis of the observed market microstructure?

<ESMA_QUESTION_338>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_338>

Q339: In your view, does the tick size regime proposed under Option 1 offer sufficient predictability and certainty to market participants in a context where markets are constantly evolving (notably given its calibration and monitoring mechanisms)?

<ESMA_QUESTION_339>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_339>

Q340: The common tick size table proposed under Option 1 provides for re-calibration while constantly maintaining a control sample. In your view, what frequency would be appropriate for the revision of the figures (e.g., yearly)?

<ESMA_QUESTION_340>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_340>

Q341: In your view, what is the impact of Option 1 on the activity of market participants, including trading venue operators? To what extent, would it require adjustments?

<ESMA_QUESTION_341>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_341>

Q342: Do you agree that some equity-like instruments require an equivalent regulation of tick sizes as equities so as to ensure the orderly functioning of markets and to avoid the migration of trading across instrument types based on tick size? If not, please outline why this would not be the case.

<ESMA_QUESTION_342>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_342>

Q343: Are there any other similar equity-like instruments that should be added / removed from the scope of tick size regulation? Please outline the reasons why such instruments should be added / removed?

<ESMA_QUESTION_343>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_343>

Q344: Do you agree that depositary receipts require the same tick size regime as equities’?

<ESMA_QUESTION_344>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_344>

Q345: If you think that for certain equity-like instruments (e.g. ETFs) the spread-based tick size regime¹ would be more appropriate, please specify your reasons and provide a detailed description of the methodology and technical specifications of this alternative concept.

<ESMA_QUESTION_345>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_345>

Q346: If you generally (also for liquid and illiquid shares as well as other equity-like financial instruments) prefer a spread-based tick size regime² vis-à-vis the regime as proposed under Option 1 and tested by ESMA, please specify the reasons and provide the following information:

<ESMA_QUESTION_346>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_346>

Q347: Given the different tick sizes currently in operation, please explain what your preferred type of tick size regulation would be, giving reasons why this is the case.

<ESMA_QUESTION_347>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_347>

Q348: Do you see a need to develop a tick size regime for any non-equity financial instrument? If yes, please elaborate, indicating in particular which approach you would follow to determine that regime.

<ESMA_QUESTION_348>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_348>

Q349: Do you agree with assessing the liquidity of a share for the purposes of the tick size regime, using the rule described above? If not, please elaborate what criteria you would apply to distinguish between liquid and illiquid instruments.

<ESMA_QUESTION_349>

¹ Please see the description of Option 2 regarding tick sizes below.

² Please see the description of Option 2 regarding tick sizes below.

TYPE YOUR TEXT HERE
<ESMA_QUESTION_349>

Q350: Do you agree with the tick sizes proposed under Option 2? In particular, should a different tick size be used for the largest band, taking into account the size of the tick relative to the price? Please elaborate.

<ESMA_QUESTION_350>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_350>

Q351: Should the tick size be calibrated in a more granular manner to that proposed above, namely by shifting a band which results in a large step-wise change?

<ESMA_QUESTION_351>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_351>

Q352: Do you agree with the above treatment for a newly admitted instrument? Would this affect the subsequent trading in a negative way?

<ESMA_QUESTION_352>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_352>

Q353: Do you agree that a period of six weeks is appropriate for the purpose of initial calibration for all instruments admitted to the pan-European tick size regime under Option 2? If not, what would be the appropriate period for the initial calibration?

<ESMA_QUESTION_353>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_353>

Q354: Do you agree with the proposal of factoring the bid-ask spread into tick size regime through SAF? If not, what would you consider as the appropriate method?

<ESMA_QUESTION_354>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_354>

Q355: Do you agree with the proposal to take an average bid-ask spread of less than two ticks as being too narrow? If not, what level of spread to ticks would you consider to be too narrow?

<ESMA_QUESTION_355>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_355>

Q356: Under the current proposal, it is not considered necessary to set an upper ceiling to the bid-ask spread, as the preliminary view under Option 2 is that under normal conditions the risk of the spread widening indefinitely is limited (and in any event a regulator may amend SAF manually if required). Do you agree with this view? If not, how would you propose to set an upper ceiling applicable across markets in the EU?

<ESMA_QUESTION_356>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_356>

Q357: Do you have any concerns of a possible disruption which may materialise in implementing a review cycle as envisioned above?

<ESMA_QUESTION_357>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_357>

Q358: Do you agree that illiquid instruments, excluding illiquid cash equities, should be excluded from the scope of a pan-European tick size regime under Option 2 until such time that definitions for these instruments become available? If not, please explain why. If there are any equity-like instruments per Article 49(3) of MiFID II that you feel should be included in the pan-European tick size regime at the same time as for cash equities, please list these instruments together with a brief reason for doing so.

<ESMA_QUESTION_358>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_358>

Q359: Do you agree that financial instruments, other than those listed in Article 49(3) of MiFID II should be excluded from the scope of the pan-European tick size regime under Option 2 at least for the time being? If not, please explain why and which specific instruments do you consider necessary to be included in the regime.

<ESMA_QUESTION_359>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_359>

Q360: What views do you have on whether tick sizes should be revised on a dynamic or periodic basis? What role do you perceive for an automated mechanism for doing this versus review by the NCA responsible for the instrument in question? If you prefer periodic review, how frequently should reviews be undertaken (e.g. quarterly, annually)?

<ESMA_QUESTION_360>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_360>

5. Data publication and access

5.1. General authorisation and organisational requirements for data reporting services (Article 61(4), MiFID II)

Q361: Do you agree that the guidance produced by CESR in 2010 is broadly appropriate for all three types of DRS providers?

<ESMA_QUESTION_361>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_361>

Q362: Do you agree that there should also be a requirement for notification of significant system changes?

<ESMA_QUESTION_362>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_362>

Q363: Are there any other general elements that should be considered in the NCAs' assessment of whether to authorise a DRS provider?

<ESMA_QUESTION_363>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_363>

5.2. Additional requirements for particular types of Data Reporting Services Providers

Q364: Do you agree with the identified differences regarding the regulatory treatment of ARMs.

<ESMA_QUESTION_364>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_364>

Q365: What other significant differences will there have to be in the standards for APAs, CTPs and ARMs?

<ESMA_QUESTION_497>

Q498: What arrangements could be put in place to support competent authorities identifying what OTC contracts are considered to be economically equivalent to listed contracts traded on a trading venue? ?

<ESMA_QUESTION_498>
TYPE YOUR TEXT HERE

<ESMA_QUESTION_498>

Q499: Do you agree with ESMA’s proposal that the “same” derivative contract occurs where an identical contract is listed independently on two or more different trading venues? What other alternative definitions of “same” could be applied to commodity derivatives?

<ESMA_QUESTION_499>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_499>

Q500: Do you agree with ESMA’s proposals on aggregation and netting? How should ESMA address the practical obstacles to including within the assessment positions entered into OTC or on third country venues? Should ESMA adopt a model for pooling related contracts and should this extend to closely correlated contracts? How should equivalent contracts be converted into a similar metric to the exchange traded contract they are deemed equivalent to?

<ESMA_QUESTION_500>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_500>

Q501: Do you agree with ESMA’s approach to defining market size for physically settled contracts? Is it appropriate for cash settled contracts to set position limits without taking into account the underlying physical market?

<ESMA_QUESTION_501>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_501>

Q502: Do you agree that it is preferable to set the position limit on a contract for a fixed (excluding exceptional circumstances) period rather than amending it on a real-time basis? What period do you believe is appropriate, considering in particular the factors of market evolution and operational efficiency?

<ESMA_QUESTION_502>
TYPE YOUR TEXT HERE
<ESMA_QUESTION_502>

Q503: Once the position limits regime is implemented, what period do you feel is appropriate to give sufficient notice to persons of the subsequent adjustment of position limits?

<ESMA_QUESTION_503>

<ESMA_QUESTION_610>

Q611: What are your views on the systems, procedures, arrangements and timeframe for (1) the submission of a transaction to the CCP and (2) the acceptance or rejection of a transaction by the CCP in view of the operational process required for a strong product validation in the context of ETD and OTC? How should it compare with the current process and timeframe? Does the current practice envisage a product validation?
